Fall 2022 (Dr. Evangelia Chalioti)

Achievement

Raymond Powell Teaching Prize, Yale University, 2022-2023

Featured Student Feedback

“Tuyetanh Tran is without a doubt the best academic mentor I have had in all of my years at Yale. Her excellent problem-solving abilities, quick-thinking, eloquence in explanation, and natural aptitude for genius have made it a pleasure to learn economics and mathematics from her. Any organization would be lucky to have her.”

“Tuyetanh was literally the best TF I have ever had. She did a great job answering all of our questions and would even take questions home and respond in greater detail later. Her office hours single-handedly clarified all my doubts. Tuyetanh MUST be a TF in future iterations of this class, she's so great!!”

“Very kind and patient during Office Hours, provides detailed and elucidating explanations for points of confusion, and clearly explains with the intention of helping students understand the concept, rather than only the problem set question.”

“Thoroughly helps explain the steps of the problem and is very very helpful. She stayed past the hour to help answer any other questions.”

“I attended Tuyetanh's discussion section every Friday morning for the entire semester and she did a great job of going through the answers to the problem sets with me. This was very helpful whenever I didn't completely understand a problem set question during office hours earlier in the week, especially since solutions to the problem sets were not posted for this class. She was also very helpful in answering any follow-up questions I had.”
